DYLAN BAILEY

SOFTWARE ENGINEER

PROFILE

Full-Stack Software Engineer. I graduated from Georgia State University in 2016 after pursuing a Sociology degree. During my time in college, I took a handful of coding courses and they inspired me to enter the world of programming. My latest accomplishment on this path is completing an intensive 16 week coding bootcamp from DigitalCrafts where I honed my skills to an extremely fine point. My studies and creations there solidified my love of computers that I have held from an early age. My graduation date is in May 2018 and I am eagerly looking to connect with companies that require my talents

SKILLS

- JavaScript
- Python
- Node.js
- React/Redux,
- Rust
- Express,
- RESTful API
- PostgreSQL
- Sequelize
- Bootstrap
- AWS
- Flexbox
- HTML

SOFTWARE PROJECTS

CRYPTOKEEPER | HTTPS://DBAILE6.GITHUB.IO/TEAMIDMBLOCKCHAIN/ MARCH 2018

- A cryptocurrency tracker where crypto enthusiasts can create a custom list of currencies to track in addition to view their total net worth in USD.
- Built with HTML, Flexbox, JavaScript, and jQuery
- Designed and assembled a fully mobile-responsive layout and creation of current cryptocurrency data with dynamically generated tables.

BIBLIOTECH | HTTP://EC2-54-85-29-237.COMPUTE-1.AMAZONAWS.COM:3000/ APRIL 2018

- A social networking site a la Goodreads with a focus on users displaying books they are willing to lend out to friends. Every person is their own personal library.
- Built with HTML, Flexbox, JavaScript, PostgreSQL and Node.js. Deployed via AWS.
- Designed and assembled a fully mobile-responsive layout and routed information being passed from the database

PROFESSIONAL EXPERIENCE

RATERLABS | INTERNET ANALYST | ATLANTA GA AUGUST 2017-CURRENT

* Analyzing search engine results to assist with the creation of search engine algorithms
• Filtering out content that is not suitable for a wide audience, creating an internet experience that is tailored to anyone that wishes to use it

CRAWFORD MEDIA SERVICES | METADATA WRITER | ATLANTA, GA JUNE 2016-JUNE 2017

* Worked on the MTV Vault Project to create metadata for a database ran by Viacom employees in order to access their large media archive more easily.
•Analyzed and assessed video content under a strict time limit.
